SELECTED MUSEUM HIGHLIGHTS:

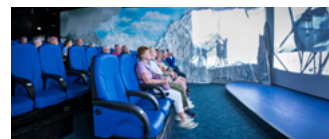

The Polar Ship *Fram*

Go on board and explore one of Norway's definitive national treasures - the polar ship *Fram*. The new 270° surround film experience runs from the deck of *Fram*, continuously all day.

N25 – A Flight to Remember

The new polar flight simulator can be experienced in our new 4D cinema. Entrance to this 5 minute action-packed movie is included with your museum ticket.

Trapped in Ice

Enter our polar expedition simulator. What happens when a ship is caught in the ice and slowly ground to pieces? Have you ever seen the effects of scurvy? With a moving floor and freezing temperature, this room is **not** for the faint of heart!

Introduction film in 10 languages

Start your tour with our polar explorers introduction film in the Fram building. The show runs continuously throughout the day and serves as a quick crash course in polar history.

The Polar Ship *Gjøa*

Our second building houses *Gjøa* – the first ship through the Northwest Passage. Access the building through the tunnel walkway and learn about the 400 years it took to find this elusive sea route.
